Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Allowable Subject Matter

1. Claims 4 and 6-43 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 6, Bogner discloses an antenna comprising a conductive bottom member, a conductive side member, a conductive member arranged in a space surrounded by the bottom member and the side member, wherein the conductive member is connected to a signal line for transmission and/or reception, and a conductive ceiling member covering all or part of the space. Bogner, however, fails to further teach that the conductive member extends its entire length normally of the conductive bottom member and the ceiling member.

Claims 7-9 and 41 are allowed for depending on claim 6.

Regarding claim 10, Bogner discloses an antenna comprising a conductive bottom member, a conductive side member, a conductive member arranged in a space surrounded by the bottom member and the side member, wherein the conductive member is connected to a signal line for transmission and/or reception, and at least one of the bottom member and the side member have openings. Bogner, however, fails to specifically teach that at least one of the bottom member and the side member has an opening other than an opening for the signal line.

Claim 12 is allowed for depending on claim 10.

Regarding to claim 15, Bogner and Sanford disclose an antenna comprising a conductive bottom member, a conductive side member, a conductive member arranged in a space surrounded by the bottom member and the side member, wherein the conductive member is connected to a signal line for transmission and/or reception, and a dielectric member having a permittivity higher than air provided in the space. Neither Bogner nor Sanford, however, further

teach a conductive ceiling member covering a part of the space and covering only a portion of the dielectric member.

Claims 16 and 17 are allowed for depending on claim 15.

Regarding claim 22, Bogner teaches an arrangement method of antennas, each antenna comprising a conductive bottom member, a conductive side member, a conductive member arranged in a space surrounded by the bottom member and the side member, wherein the conductive member is connected to a signal line for transmission and/or reception, the method comprising a step of aligning and arranging plural antennas as cited above in a manner to produce a direction for minimizing directivity of each of the antennas on a horizontal plane. Bogner, however, fails to further teach a conductive ceiling member covering all or part of the space, and the conductive member extending its entire length normally of the conductive bottom member and the ceiling member.

Reasons for indicating allowable subject matter for claims 4, 11, 13, 14, 18-21, 23-40, 42 and 43 were provided in the previous Office action.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
